DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Arthur Samodovitz on February 20, 2006.

The application has been amended as follows:

IN THE CLAIMS:

Claim 26 (Currently Amended) A method as set forth in claim 22 wherein :

said first name comprises a first, last or nickname of said user and a first geographic location associated with said user; and

said second name comprises said first, last or nickname of said user and a second, different geographic location associated with said user.

Allowable Subject Matter

Claims 16-33 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for simplifying the authorization process for a user to access different resources by correlating two or more different usernames

or group usernames to the same userID. Each independent claim identifies the uniquely distinct feature of “authorization means, responsive to receipt of a request based on said userID to access a resource and authentication of said userID, for determining based on said first table entry that said userID corresponds to said first user name, determining based on said second table entry that said userID also corresponds to said second user name, determining based on said third table entry that said first user name is part of said first group, determining based on said fourth table entry that said second user name is part of said second group, and determining based on said fifth table entries whether any of said first name, said second name, said first group or said second group is authorized to access the requested resource, and if so, granting said userID access to said requested resource”. The closest prior art, Madison (U.S. 2004/0015703), discloses a conventional system for granting users access to resources, fails to anticipate or render the above underlined obvious. More specifically the prior art does not simplify the authorization

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
